

MODERATOR BIO:

Nadia Paleari is Sustainability Lead at *beeco, tech hub that promotes sustainable practices and synergies in the agrifoodtech sector, supporting access to advanced technologies for communities. Appointed a European Climate Pact Ambassador by the European Commission, she participates in the international UN climate negotiations as an accredited UNFCCC observer. Nadia works at the intersection of technology, sustainability, and diplomacy to design ecosystems that speed a just, climate-resilient transition. As a trainer and facilitator, she partners with companies, research centers, and international organizations to advance climate innovation and empower changemakers across sectors.

Senior Mechanical Engineer & Technical Manager

With over 25 years of experience in the metalworking and manufacturing industry, I am a dedicated Mechanical Engineer specializing in R&D project management and Technical Department leadership. **Since 2021, I have been a key member of the team at Strahl Srl, where I leverage my deep expertise in drying technologies to drive innovation and efficiency.**

My technical background is rooted in complex manufacturing processes, including mass production using steel, stainless steel, and aluminum. I possess extensive hands-on experience in plastic injection molding and metal die-casting. Beyond production, **I am an expert in Quality Management Systems, with a proven track record in securing machinery certifications and navigating the rigorous regulatory requirements for Medical Devices.**
